

[CLS]The Education Reform Programme meets the same objectives and purpose as the preceding programme, but benefits from an investment increase amounting to MEX 30 189 607 million, which also results in a wider reach as the programme is active in a total of 66 schools in 2015 - 16 (Gobierno de Morelos, 2016a). Student books, cafeteria equipment as well as administrative and classroom furniture were some of the additional investments made towards improving school materials and infrastructure (Gobierno de Morelos, 2016a). Through the Mexico Connected project that aims to expand Internet connection in the state of Morelos, broadband access between 2 and 50MB (megabites) will be installed in educational institutions in two phases. The first phase is planned to cover 1 331 places and the second should cover 430 places (Gobierno de Morelos, 2016a). [SEP]
